DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 4-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The invention as claimed in independent claim 1 requires a base layer contains no additives whose density is above the density of the polypropylene (line 10 of claim 1) and also claims vacuole-initiating fillers (line 9 of claim 1). The specification as originally filed exemplifies vacuole-initiating fillers (i. e. additives) such as aluminum oxide, aluminum sulfate, barium sulfate, polyesters, polystyrenes etc. at page 12, lines 5-23. These vacuole-initiating fillers appear to have density higher than the density of polypropylene. The specification as originally filed fail to exemplify vacuole-initiating fillers having density equal or less than the density of polypropylene. Therefore in

Art Unit: 1794

absence of exemplifying vacuole-initiating fillers having density equal or less than the density of polypropylene, a person of ordinary skill in the art has to carry-out burden some experiments to practice the invention.

5. Claims 1 and 3-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 9-10, the phrase "the base layer contains vacuole-initiating fillers" and the phrase "(base layer) contains no additives whose density is above the density of the polypropylene" renders claims indefinite since vacuole-initiating fillers is also an additive and disclosed vacuole-initiating fillers at page 12, lines 5-23 are appears to have density higher than the density of polypropylene.

Claim 3, line 1, the phrase "the propylene-ethylene copolymer" lacks clear antecedent basis. No propylene-ethylene copolymer has been previously recited therefore limitation cannot be understood. Making claim 3 depending from claim 1 may over come the rejection.

6. Claim 2 deemed allowable since art of record does not teach vacuole-initiating fillers in the base or core layer and claimed surface layer.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to D. S. Nakarani whose telephone number is (571) 272-

1512. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Rena Dye can be reached on (571) 272-3186. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
